

EQUIPMENT SALES LTD.

NORGUIDE®
Saves you money

Let our NORGUIDE® Quick Change Saw Guide System guide your saws to increased profits.

Regardless of what make, style, or size of bandmill you have, you can:

- INCREASE production time (reduce down time)
- INCREASE lumber recovery
- INCREASE sawblade life
- INCREASE cost effectiveness by re-surfacing each guide block up to 40 times
- INCREASE accuracy

At Norpac Equipment Sales Ltd., we specialize in guide conversions. We make custom designed systems to meet your requirements.

- **NORGUIDES®** maintain full contact with the saw blade regardless of the amount of guide material expended.
- Changing a **NORGUIDE®** is fast and easy.
- Guide material costs are substantially reduced.
- **NORGUIDES®** are held positively to ensure no guide movement while sawing.
- **NORGUIDE®** accuracy equals increased lumber recovery.
- Top guide bracket incorporates compact, internally ducted, wide angle spray system. (Standard on A series)
- **NORGUIDE®** re-alignment is automatic, reducing downtime.
- Additional features include: robust construction, quality materials, precision engineering, and much more.

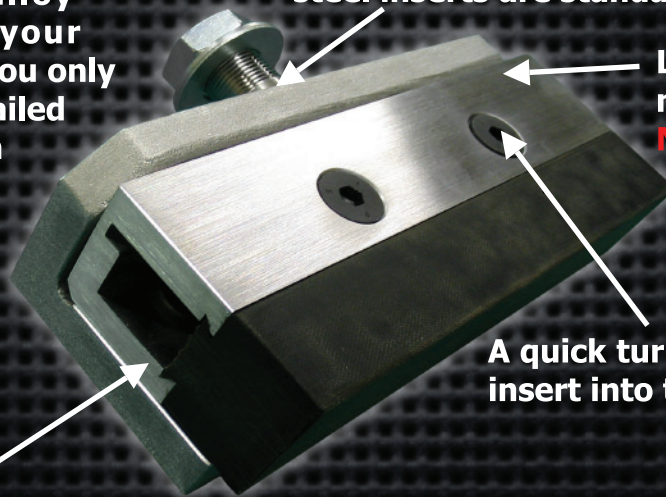

EQUIPMENT SALES LTD.

You make a one-time purchase of **NORGUIDE®** aluminum alloy adaptors in the size of your choice, and from then on you only pay for the low cost dovetailed **NORGUIDE®** inserts which can be quickly slipped into the adaptor and locked into place.

Lightweight aluminum alloy cartridges with steel inserts are standard on most sizes.

Lightweight precision-made aluminum alloy **NORGUIDE®** adaptor.

A quick turn of the key locks the insert into the adaptor.

The dovetailed insert slides into the adaptor block quickly and easily.

Full utilization of valuable guide material is accomplished.

NORGUIDE®
Saves you money
